Relevant Experience

Freelance Software Developer

December 2019- Present // Kampala, Uganda

- I used JavaScript libraries such as mongoose, mysql, and mysql2, to connect applications to databases (Mongo DB & MySQL)
- I built Auth systems for both web and mobile applications using Node.js and its minimalist web framework Express
- Built Admin Dashboards using React.js and libraries such as react-tables
- Using payment gateways such as flutter wave and stripe, I implemented payment and subscription functionality to website applications.
- Using styling libraries such as styled-components, material UI, bootstrap & tailwind CSS to build web applications with responsive UIs with the mobile-first approach in mind.

Recent Projects

Bristo Web and Mobile Restaurant Application

React, React-Native, axios, redux

Front-end application

Notes Mobile Application

React,React-Native, Node.js, Express, MongoDb, express.js

Full-Stack application

Education

Makerere University, College of Engineering

2019 - 2024 // Kampala, Uganda

Bachelor of Science in electrical Engineering.

Seeta High School

2016 - 2018 // Seeta, Mukono

Uganda Advanced Certificate of Education

Skills

Design Tools

Figma, Adobe XD, Framer, Canva

Programming

JavaScript, HTML, CSS, TypeScript
Next.js, Node.js, Express.js, React-Native, React.
Python, Flask, C/C++

Tools and Platforms

Git,Docker, Linux, Kubernetes, Jenkins, MongoDb, MySQL, Git, Cypress, Jest

Other Tools and Technologies

Heroku, GCP,AWS, Oracle Cloud, Linode, chrome debugging tools

Interests
